

❖ SUFOG NEWSLETTER ❖

NUMBER 91 AND 92

MAY / JUNE 1998 ;

EDITORIAL.

Before I go any further, may I publicly apologies to 'The Wheatear' 'Alias' Graham Harrop for not including his name in the list of thank you's in the last issue of SUFOG. This was an oversight on behalf of the editor, and may I thank him for his hard work and dedication in producing his articles that have appeared in the newsletter and for Pucks Review.

Since the last newsletter, there have been a number of interesting points that have arisen through the press (See further notes on press reviews page 7).

We have seen scientist express excitement that the finding of water in the far reaches of the galaxy, could mean life in outer space (see article on page 18). Also, a British astronomer, on the 7th April predicted that alien life will be discovered within the next 25 years (according to the Daily Mail 8th April) with the Darwin Mission. This is a £500 million project to launch 5 small, infra-red telescopes, with 1.5 meter mirrors, that will be launched aboard an Ariane 5 space rocket from French Guyana. They will travel for approx. 2 years and stop approx. 400 million miles from the Sun. The combination of the 5 telescopes will give the clearest pictures ever to be achieved, even clearer than the Hubble telescope. Will we see life, that up

until now, has been hidden far beyond human expectations... We wait, hope and pray that maybe we UFOlogists will be vindicated come the day, man makes contact... Or have we already....

This leads me nicely to the following item of news. The Sun newspaper (I know, I smirked at the idea too !) carried a 3 day review of a new book to hit the book stands called 'Abducted' (Nice original title... Don't you agree !!!). This concerns a 14 year old boy, who, it is claimed, has been abducted by aliens since the age of 4 years old. One thing that the article in the Sun fails to mention (But the Daily Mail did on the 21st March) is that : 'All this has been highly profitable. The Andrews family have been mostly broke for years, sometimes living on less than £15 a week. The only asset they have ever owned is the scrubby little ten-acre smallholding, near the village of Borough Green, which they bought nine years ago for £25,000.

They live in a nearby council house. But every day the family move up to their much-loved scrap of land and tend to their livestock - a few ponies and a flock of geese.

Now all that has changed. The money will soon be rolling in. They

are already guaranteed some £60,000 from the book, including money from The Sun, who serialized it this week. They have their own agent and the celebrity chat show circuit beckons'

So, I ask myself, why did The Sun fail to mention these minor points in its 'Major' serializations.... I must be getting old and cynical, but when I read the story in The Sun, I am afraid I have a lot of doubts in my mind. I wonder who has the most to gain from this alleged story, the son, the parents, the journalist who helped to write the book, or The Sun newspaper ? From what I read in The Sun, I will not be buying the book, to line someone else's pocket. I feel sorry for the lad, if he has been pushed into revealing 'HIS' story, for the parents to make money from it. Many people seem to be popping out of the woodwork to produce their own books and the £££££ signs start to flash in front of their very eyes. This does not do them any good, or the world of UFOlogy. Read the article and the book to make up your own minds, but mine is already made up I am afraid, and this is one book that will not be gracing my book shelves in a month of Sundays.

So, the 'face' on Mars is a natural feature ran the headline in the Daily Telegraph.... It appears now, that the 'face', has now become a Footprint.... That's right.. I suppose you could say 'Someone (Or something !) has put their foot in it !!!'. The article went on to say that..... 'it looks like a

giant stuffed pepper or a sandal print'... 'The new pictures from the Mars Global Surveyor have dashed hopes of alien enthusiasts who clung to the theory that the landmark had been built by extra-terrestrial life forms...' I wonder what planet the Surveyor was over and were these pictures taken over Cydonia. How can the 'face' change so quickly after only 20 years... Is NASA hiding the facts from us yet again? If they are, what are they hiding? We still have no definitive answer about the Face on Mars as far as I am concerned, I still feel that the images taken in 1976, are being covered-up, just like 'Why have we not visited the Moon since the last Moon landings'?....

A few bits of other news before the editorial wine's down, is that Tony Dodd has retired as director for investigation for Quest International and from UFOlogy. This I understand is partly due to health reasons as well as his wife also not being in the best of health. Ufologists I feel around the world owe Tony a lot of thanks and admiration at the work he has done within the UFO field. Also, I have recently heard that Ron West of the Essex UFO Research Group has recently been taken ill, and we wish him full and quick recovery.

Whilst at the Dorchester Conference I managed to catch up with Graham Birdsall, and after a short chat, it appears that Quest International and the Southampton UFO Group may be organizing a joint conference in 1999. Obviously, things will have to be finalized etc, but watch out as Southampton may see its first major UFO conference in Southampton for many a year in

1999 and I hope we may be able to have a couple of well known speakers ... One I hope to be is Graham Birdsall himself. So folks, save your pennies, and as they say in the press WATCH THIS SPACE.

One of the last remain UFO magazines available to the general public on the open shelves 'Alien Encounters' has folded. Following a recent conversation with Omar Fowler, who confirmed the rumors that I have been hearing, Alien Encounters has gone the way of UFO Reality. It now looks like UFO Magazine, has the magazine stands to itself concerning UFOlogy. I do not know if the magazine 'Sightings' is still going, as I have not seen a copy in my local newsagents for some time now. So where does it leave UFOlogy in the high street... Well, I think the best magazine available is still there on the newsagents shelves and I must admit, I will not miss Alien Encounters, but, I suppose that the letter I wrote to the editor a few weeks ago, will not now be published.... Oh well, better luck next time.

We also have a report on the Dorchester conference attended by myself and group member Bill Smith. Finally, we have read the stories of animal mutilations around the world, well what about an animal mutilation in Southampton Read on...

Change of Address for Malcolm Robinson SPI (Scotland).

Malcolm has asked me to publish his new address just in case people are unaware that he has now moved :

Malcolm Robinson (SPI)
41 Castlebar Road
Ealing
London
W5 2DJ.

Tel : 0181 998 4936
Pager : 04325 345 753.

According to Malcolm's letter dated 24th April, SPI is still active, but is now being fronted by Billy Devlin. Malcolm aims to run a sister group of SPI in London, providing research and information of which he will be submitting to the magazine and web site.

YOUR EDITOR NEEDS YOUR HELP ... HELP ... HELP

Can anyone out there help the editor with the following :

Did anyone watch GMTV on Wednesday 29th April? Did you record it? If you did, the editor would like to hear.

A group member advised me that The Sunday Mirror Magazine dated 26th April contained a large article concerning UFO's. Does anyone have a copy or can you provide me with a photocopy.

One final thing, has anyone seen any reports concerning a UFO sighting over Southern England over the last week (20th April onwards). If you have, can you please supply me with any details.... !!!

to believe. All in all the sci-fi weekend was a rather boring weekend of programs.. I would go so far as to say a load C**P.....

I already have 3 programs concerning this mystery creature that some people believe may of originated from outer space. The program centered around John Downes and group investigator / camera man. They visited Florida where it is alleged that 'The Goat Sucker' has made an appearance and they went to Puerto Rico and Mexico in search of evidence for the creature. They went into caves in search of the elusive animal / creature / alien, where it was believed the creature lived, but alas, nothing was found. Their adventure took them to Orizaba in Mexico in a Volkswagen Beetle.... Mind you John Downes is not a 'small' man to say the least, and to see him getting in and out of this small car, well need I say more.. the imagination was running overtime. It was a very interesting program, **But** most of the evidence was circumstantial, anecdotal and from local people, who's way of life is steeped in traditions and traditional tales of mystery with a mixture of ancient religion, Catholicism which equals dragon gods & blood sacrifices, people need to believe in something ! so people 'invent' iconism's of their own. So where does traditional 'stories' start and reality take over.

31.5.98 : Everyman : Where do I start ! For once, a program where abductees could talk without being asked stupid questions and being interviewed by brainless morons with a brain the size of a walnut !!!

There were many many good points raised throughout the program and for a 'religious' based program, I raise my hat to it. Mind you, this is not the first time that the subject has been tackled on this program.

The program was based around

Television Programs :

A few late runners this month starts the reviews of television programs that were not covered in the last issue...

24 th March : This Morning : This involved interviewing the mother of a lad abducted by aliens (See editorial) and the journalist who wrote the book 'Abducted' with the mother. Although I still do not have a copy of the program, I have watched it and to be honest, the presenter Richard Maidley needs shooting. He thought the whole thing was a laugh and quit honestly, I have grave reservations about the case / book, but I think the editorial sums up my views.

4 th - 5 th April : CH5 Science Fiction Weekend.. This included an item on UFO's, in which local people from the Isle of Wight were interviewed and they said the Isle of Wight was one of the best places for UFO sightings and reports. You could say, a hot spot. The problem is, no other groups in the area have heard about the activity, certainly not the Southampton UFO Group !!!..... Also, there was a studio audience of teenagers and a few phone-calls including ghost stories and a few other weird & wonderful stories that seemed to be a little way out

6th April - Aliens Among Us...

This was shown on the cable channel and was in fact a program that had been screened a few months earlier, but had been cut down from 60 Mins to only 30 Mins. The program concentrated on Bob Lazar and Area 51. In fact it was more interesting being on for just 30 Mins than a full hour. One to be shown at a later group meeting....

30th April - Ultra Science : This was a very interesting program looking at secret aircraft that we know nothing about and the governments of the world are spending billions of dollars on, and maybe, these are the 'UFO's' that people are seeing... Who knows.. The governments of the superpowers will certainly not tell us the truth behind the 'Flying Triangles'.. Are they ours or theirs... ET, please phone me... !!!!

2.5.98 : City Central (ITV Police Drama)... Several reports of UFO's made to police station and program ends with UFO (ball of fire with a trail) shooting across the sky in the background.... Where will UFO's pop up next !!!

5th May - To the Ends of the Earth : The Chupacabra...

a radio program, 1299 CJBK radio in Canada, and a program presented by Rob McConnel - The X-Zone. The program featured researchers such as John Mack, Budd Hopkins and Dr. Michael Persinger. Here are a few comments that they made :

John Mack : 'I faced a dilemma when I encountered the subject... To take the material and place it in an old psychiatric model or expand my world views.. I trusted my clinical views, more than my world views - abductions are not like fantasies, dreams or delusions... abductees reality is shocked and it becomes a trauma, and I am enraged with this, but I have to accept it.... My world views have been shattered emotionally and it has physically shattered the way I see the world.'.....

Budd Hopkins.. Talked about his sighting over 30 years ago at Cape Cod of a circular, metallic object, aluminum in colour... 'I felt at the time like I was at the bottom of an aquarium and the object was studying me'.....

Abductee Karen.. I woke in my reality and went 'through' doors, walls and windows. They went into my head and started flashing information into my head and removed my life through flashing images - I could see my life flashing by... I was physically examined to make sure my body was intact and working properly. I was shown images of apocalyptic visions - it had a message - it was the path we were on and we had to do something about it... I felt tense and terror when 'they' entered the room and the more I accepted what was happening to me, the more knowledge that I would receive... You are given information, that becomes part of your reality ! and I am now out of

the closet.... I am not trying to fit 'IT' into 'MY' life, but fit into 'IT'... It is a great responsibility to help another race re-create another species or to save it... The experience is far reaching into my life - boyfriends are impossible and how do I integrate with someone who is questioning the way we live. I feel like a deer in car's headlights. What do you do ? A sense of time, time running out and I am lost and confused.

Abductee Aleta : I woke up down stairs and saw long, light coloured fingers around my arms. My body levitated up and out through the window. I had no fears of the abductee's, but a feeling of familiarity and a relationship with them. I felt a deep respect and love from them, that I felt for them... At first I did not want to speak about what was happening. I couldn't see how it could be a reality in my day to day life. I asked the alien for conscious interaction - why are you here ? The next day my whole life had changed.... I was shown children.. They are creating a race to re-seed the earth and if they cannot re-produce, they take part of me.

Alita's Husband : This whole experience is not a threat to our marriage, but a benefit. We see things in a different light now....

The Raelian Movement was also brought into the equation ... Raelians do not believe in god, but we were created by a more advanced alien race a long time ago. Claude Rael is the prophet of our time. 'They' created all life on earth and we are the fruits of experimentation of the alien race. The more reports that we are seeing, means more signs of them. We are their children and they want to come back and save their

creation. Eternal life exists, with a small intervention. The ET that created life, has the power to create Eternals....

Other people mentioned on the program were doctor Persinger, who claimed that he could created the alien abduction experiences in his laboratory and it was all in the mind.... Also, author Dr. Barry Downing - drew comparisons with angels and alien beings and quoted a number of items from the bible to back up his ideas...

This was a fine program that had the balance right between the investigator, the sceptic and the abductee's.. One or two or points raised in the program, mainly by the commentator and Rob McConnel - 70% of North American's believe in UFO's ... There are 900 million Catholic's who believe in a god, that they have NEVER seen... As programs go, I would have to give this program 20 out of 10, because of the points previously raised and it must be one of the best programs so far in 1998... What lies in the future...

With this issue of the SUF0G magazine, readers are in for a treat with the second edition of Pucks Review by our crop circle agent Graham Harrop.

This is free to readers, but if you wish to reply to any points raised in the publication, then please forward your letters to me and I will pass them onto Graham who is in hiding awaiting the backlash of Pucks Review....

YE OLDIE NEWSPAPER REVIEWS BY ERNIE SEARS ESQ.

In spite of our poor Editor's bemoanings that 'it's all quiet', in the wider field of UFOlogy there's been no shortage of really sensational articles in the national press, beginning with :

The Sun : of March 16th which began a series of excerpts from a new book by author Jean Ritchie, "Abducted". This not very original title purports to be the story of Jason Andrews, and involvement of his whole family, since he was aged four, in abductions and many paranormal events. The book's subtitle says it 'proves the truth is out there' ! We shall see what the country makes of it. Certainly a BIG BIG coverage, pages of it !

The Daily Telegraph : of March 28th carried a UFO headlined news item on Author Derek Sheffield's close encounter with, guess what ? flying cricket balls ! A court case involving Derek and the 166 year old Rolveden Cricket club whose stray balls have been arriving on Dereks personal earth since they moved there 15 years ago ! Oh, well !

The Daily Mail : March 28th, not to be outdone by anyone, came up with a superb daily coverage of famous author Colin Wilson's new book, "Alien Dawn", out on May 21st by Virgin Books.. usual

£16.99 ! To say this one is "sensational" puts it mildly.. coming from a former sceptical author.. I've correspondence going back years with Colin !.. and the Mail devoted pages, and pages, to it over some days. No compromise from Colin.. 'They're HERE' he concludes ! well, we KNOW that, whatever "they" are ! Trouble is, our Governments still deny us our right to know !

The Daily Mail : sometime in March, carried a somewhat plaintive letter from a G.E.D. Dodd (?) from Yorkshire (?) whose plea to be abducted stemmed from reading 'Almost every other day', of 'sad people claiming abduction by aliens and abused in unimaginable ways'.. much exaggeration from the writer, so I replied, (letter not published) putting him, or her, straight !

The Times : of April 4th had it's usual "young people's" magazine "MEGA" going strong on those Men In Black and a guide to the "freakiest alien faces you might encounter" !

The Daily Telegraph : of April 8th featured latest discoveries of 'vast amounts of water that raise hope of alien life' in the Universe courtesy of the European Space Agency, and our own Particle Physics & Astronomy Research Council etc. Planet and life building water, ice, carbon, etc etc, some deposited by passing comets, others already there ! On the self same page, the latest from the Mars Global Surveyor shows that "face" to be more like a huge

'footprint' so far... depending on the tricks of light ! Photos shown look NOTHING like each other.. but wait ! Richard Hoagland says its really like looking at TV with a bunch of snow on it ! So the argument goes on !

The Daily Telegraph : of the 9th April continues the liquid discoveries as above with Editorial Comment quoting that European Space Agency spokesman : 'water water everywhere', and the Editor goes on to say 'incomprehensibly enormous celestial oceans' while the ESP (?) spokesman : 'so huge that their imaginations failed them' ! A discovery, says the article, which alters mankind's perception of being natures last word ! Right on !

The Daily Echo : Southampton's own, of April 7th I bought 'cos of the front page headlines that our General Hospital.. which I've been "visiting" lately.. and that's another story involving the paranormal !.. is now involved in 'Examining the truths and myths behind out of body experiences' Wow ! Slowly the barriers crumble ? A Dr. Sam Pardia is in charge and I got a letter of PDQ... doors open ? Still, poor old Steve, our Editor and group organizer, still looks for those 'Giant UFO's Over Southampton can't find parking space at General Hospital' and / or 'Greys assist surgeons' !

The Sunday People : 26th April, ran a good magazine insert of four pages on UFO's, Men In Black, Fireballs, heavily larded with familiar photos, some of which consigned to the "mistaken identity" files or hoaxes... however, the whole thing lifted nicely from Nick Redfern's new book THE FBI FILES which didn't do the lad any harm and gave the enigma a lift up too.

The Daily Mail : quickly followed, next day, 27th April, with that headlined report on the UFO that took off at an alleged 24,000 mph when two Dutch F.16's were scrambled, after it had pootled along over the North Sea at a mere

17,000 mph. 'Under Control, and the size of a battleship, about 900ft long, and triangular' ! "Someone" unidentified said it was 'most likely to be an experimental aircraft or freak weather effect'.. so why scramble two fighters since all aircraft, experimental or not, must surely log flight plans, otherwise "crunch time" with civilian ditto ? However, on May 8th The Mail had Jenny Randles assuring us that BUFORA said, in the opinion of the MOD "UFO DESK", was the invention of an ex employee with a grudge ! Let's Nick Pope out anyway ! But never fear, Jenny hasn't deserted us totally.. she added, her book "Something In The Air" reveals radar and visual intercept cases plus one senior ranking Air Commodore told her, on the record, he's seen film of UFO's made by RAF jets so far not seen by the public ! While a further item in the first instance says 'military chiefs may release film tapes showing 12 UFO's shape changing in mid-flight ! All that raises more questions than answers, doesn't it ?

The Daily Mail : had a three page spread in colour to boot of the Face on Mars and Cydonia controversy (May 9th) from Graham Hancock's new book.

The Daily Telegraph : had Dr. Richard Wiseman and Dr. Julie Milton coming up with an expose of the flaws in psychic ability, ESP, etc, in an Edinburgh University (May 8th) while coincidentally enough, since Editors surely don't pick each others brains first, do they, THE DAILY MAIL of the same date had a full page excerpt from Colin Wilson's new book, "Alien Dawn", on two scientists who had

proved such things DID occur, so there ! Might depend on who is paying you what ?

The Daily Mail : May 11th and another excerpt from Hancock's new book... this time the past vanished history of earth and its occupants due to... wait for it... cometary collisions, all the rage in the cinemas and TV currently, coincidentally ! Since some of this sort of thing has close alleged connections with other races and their technology, i.e : Sphinx, Pyramids, etc etc...

The Daily Mail's "Coffee Break" page had a query on crop circles from a previous doubter, answered by a Peter Froude of Bournemouth : 'Beyond the capabilities of the most cunning hoaxers' since recent and current designs were "impossible" to be drawn before computers. Open to debate, he says, but possibly something to do with earth's future, planetary change.. etc...

Southampton Evening Echo 11th May 1998 : Crop circle is 'vandalism'...

The first crop circle of the year has appeared - to the delight of tourists and the dismay of farmers.

A 250ft wide pattern of double concentric rings linked by a series of bars made an impression in a field of bright yellow rape near Silbury Hill, Wiltshire. But farmer David Hues, in whose field the spectacular circle appeared, says there is no mystery involved. "It is a case of vandalism to a nice crop of oil seed rape".

Daily Telegraph : of unknown May date had a front page item on the "ghost" of the former chairman of the South Metropolitan Gas Company that is alleged to haunt the Millennium

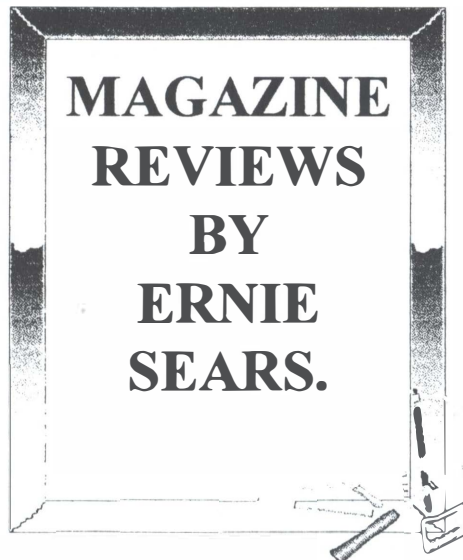

Site.. workers on the Dome and former employees who say they saw the phantom when they worked there... no wonder, the poor old devil must be turning in his unquiet grave on the waste of good money ! People have reported him laughing ! Well he might ... those aliens may be here before the edifice is completed !

The Daily Mail : 20th May leaps like so many on the Gaza bandwagon.. or should it be spaceship ? as he claims he would love to see one and indeed believes in them ! If "they" all wore football strip and dribbled a ball of their UFO the vast majority of the citizens would elect them straight away in place of the current lot of idiots ! 'Must be alright' as they guzzle their lager !

The Daily Telegraph : of May 17th.. coincidentally on the other half of the page relating to Fortean Times weekly coverage of odd things.. has Sir Roger Penrose, the Prof. Of Mathematics at Oxford, providing an advance in the workings of Einstein's theory of gravitation, Stephen Hawkins ditto, and the current theories of the universe being in the grip of some anti-gravity force combining with quantum physics. I stopped for breath there, you too ? All this, says Sir Roger, holds the key to human consciousness.. all leading to a potential explanation of ESP, one brain to another, even one cosmic brain to another ! Since the cells hold micro-tubules measuring 'just a few hundred atoms across' ! If you are aware of the ability, undoubted as far as I am concerned, of those "grays" etc to control minds, none of this surprises you, does it ? DOES IT ?

Alien Encounters for February 1998 is, it seems from all accounts, the last issue ! Another good one gone bust, altho' the Paragon Publishing company at Bournemouth appear to be still in being (From the editor.. it appears that the magazine is being published in house and available via subscription... but this still has to be confirmed by the editor..) Apart from the sometimes sensational and over the top advertising.. a necessary evil ?.. I rather liked this one. Met Editor Nina Pendred on that Channel 5 UFO item 'Espresso' seemed a straight forward young lady, genuine in her interests. This issue had that suspect Mexico UFO footage... UFO's photographed in Oklahoma thunderstorm.. the Black Triangle a clever military cover-up ?..review of Whitley Strieber's book, Communion Letters.. Abduction report under the "lucid dream" scrutiny..... Readers Stories include a 'life changing event' aspect, how very true... Military Saucers theory again (no kidding ?).. provocative story of that "hacker" into top secrets.. looks a cocky devil !... musical UFO's etc.

UFOMEK is the UFO Monitors East Kent issue 21.. impressive cover drawing of the "Black Triangle"... Jenny Randles straightens the record for that Rendlesham Forest" crash".. 'complex' she says... the Leeds UFO Conference in depth.. "What Are Going ON" by Alan Tickhill (OK, HIS grammar!) "Was Jesus an ET ?", by Jerry Anderson.. Barry Chamish talks to UFOMEK.. that "Howardgate" of March 1997 in detail with support

sightings... anything concerning "politics" highly questionable !.. why wait until a year after the general election ?.. why indeed ! No price detectable or publication dates !

THE CALLER is Jersey UFO Research Team's natty little mag.... editorial pans that "Abducted" book by Ann Andrews and Jean Ritchie.. know what I mean ?.. Nick Redfern's MOD latest released declassification.. stalemate ?.. Guernsey UFO Sighting 1995.. Zone Talk features Oxons Contact International... three West Country UFO reports from 1997.. local sighting 'definitely an aeroplane', logical explanation... Contact - The Caller, 14 Le Quesne Close, St Clements, Jersey, JE2 6NJ.

SKYWATCHERS is the well produced mag. for the Cornwall UFO Research Group... artistic cover depicts a Holy Well with an odd looking craft above, resembles a sixties Cadillac !.. interesting lecture at a group meeting and a 2 hour broadcast on a Tucson Arizona Tv show featuring that Phoenix 'Flying Wing' e.t.c March 1997 phenomena, good witnesses. Good West Country sighting

reports section.. Marc Bell's excellent article on SETI research... Elaine Darlington's Paranormal, UFO, and ET Experiences highly detailed.. think MY recent article got "lost" in the computer !... try again !.. Book reviews by Lionel Beer include 20 page booklet on North Devon sightings and Omar Fowlers splendid "Triangles" 1996 book updated.. and Sussex Skysearch sightings. Try Dave Gillham or Editor Ian Darlington c/o 24 Carrine Road, Truro, Cornwall, TR1 3XB.. six copies yearly at £12.00.

FASTER THAN LIGHT is the natty title for the Hull UFO Society magazine.. the sparkling sometimes tongue in cheek theme runs all through this new to me Issue 8 April 1998.. doesn't detract from stunning sighting reports, some from the seventies, some from 1997 ! HUFOS "Minicon 2" is Saturday 4th July at Middleton Hall, Hull Univ., Tel : 01482 470136... good speakers, 'alien visitors free' it says ! They ASKED for it ! I ignored the article on how to become the richest humanoid e.t.c... resigned that I'm NEVER going to get rich now !... Good two pager on that Silpho Moor Flying Saucer 1957.. always thought 'it was a "student hoax !"' You can now buy FLT at Chapel Street News,3 Chapel Street, Hull at 75p or £6 a year for six issues from Chris Ever, Chestnut House, 24 Chestnut Avenue, Queens Road, Hull... a lively 18 pager.

OVNI, Omar Fowlers perennial yellow cover mag, issues for March / April and May / June herewith... spoke to Omar recently on the Australian and New Zealand goings on... "Ufology at the

Crossroads ?" not so, reckons Omar.. "restrictions" on media UFO news the culprit !.. figures, but see "cuttings" report ! Those underground bases jigsaw surfaces again... Interesting (but not unique !) reports section.. MUFON article intriguing with photo of "strange animal" in Italy.. Iowa Triangles.. more 1997 triangles over Cheshire and one over Holland pursued by SIC F16's plus an AWAC 707 ! Letter from Tony Dodd relates "Invasion Earth" style scenario ! Believe it ! May / June issue stunning "Down Under" reports of huge power failures, coincidental with yours truly items here and there.. "World Changes?".. 1978 "creature" sighting in Derbyshire.. Rendlesham Forest questions from Hansard raised by Lord Hill Norton 1997 !.. most get MOD brush off !.. NOT "don't know" but "wont tell ?".. Gulf Breeze latest and that 24,000 mph UFO that "got away" over Britain TWO Years AGO, controversy over "MOD Employee hoax" claims ! Get Ovni from Omar at 94 The Circle, Sinfen, Derby, DE24 9H, £1 per issue, bi-monthly, well worth it !

AWARENESS is the handy pocket sized mag. of Oxons Contact International UFO Research.. impressive triangle cover on the March 1998 issue.. very interesting Editorial on WHY mags and news are 'dropping away'.. or ARE they ? Even the "metaphysical" suggestion can allow '500 ton mile long spaceships', Geoffrey ! Very neatly produced Sighting Summaries section, well illustrated.. Berwyn Mountain 1974 incident by Margaret Fry.. intriguing "Close Encounter in Cambodia" article by Frances

Copeland, the depths to which officialdom will descend to cover-up ?.. 1997 experiences at Avebury QUITE intriguing to yours truly.. an "energy being" etc !.. awareness mag available at £9 for 4, £14 for 8, from Po Box 23, Wheatley, Oxon, OX33 1FL. Awareness UFO Register of sightings Summary from 1978 at £1.25 each year until issue for 1982.

UFO MAGAZINE with Graham Birdsall still firmly at the helm.. May / June 1998 so bang up to date.. that Mars Face controversy still raging.. Mark Ian Birdsall's stunning report with photos from Leeds area of UFO "Lights".. those Arizona Lights.. Meteors ! the current "disaster" idiom !.. World UFO update.. alarming suicide of top General in Brazil after 20 years of UFO silence.. French UFOlogist Gildas Bourdais on those former classified USA documents.. new UFO photo evidence.. mass abduction reports. UFO letters "Viewpoint".. UFO MAGAZINE still leads what's left of the REST.. at £12 for 6 copies from Quest Publications Ltd, Wharfebank House, Wharfebank Business Center, Ilkley Road, Otley, LS21 3JP.

UFO MAGAZINE.. The USA version ! unlike our own product of the same title, this one features less advertising and more SERIOUS articles.. new sponsors have meant more pages and monthly publication.. more "Arizona Lights !" in January 1998.. world reports.. Zagreb Croatia, Chile, Taiwan.. back engineering or early transistor technology in 1948 ?.. 1944 - 1978 UFO reports and photos, "explained" by officialdom ! Congressional hearings ! Condon Committee ! United Nations !!!

e.t.c.. Republican council woman Frances Barwood says of Arizona lights e.t.s 'ours, a hoax, of from elsewhere'.. tell us something new, lady, or HONEST ! More "answers" that ignore facts exposed, on those Washington 1952 "fleets" of UFO's.. David Jacob's amazing about face on abductions in his "The Threat" new book given the heaveho by Critic Michael Miley.. all in all an excellent and SERIOUS magazine.. foreign funds \$35 for 12 issues from UFO Magazine, Po Box 66970, Los Angeles, CA9006606970. Or ask Steve where he gets his from !

IUFOPRA JOURNAL.. The Irish UFO and Paranormal Research Association.. Jenny Randles is their Director of Investigation !.. Director Aonghus de Barra (yeah!) says he believes in that "dummies" explanation for the Roswell altho' surely no "bodies" were ever discovered there and then.. somewhere else, yes. Well, whatever.. the nearer the TRUTH gets the harder authorities try to discredit it.. FEAR ! Some good cartoons.. Space Medicine.. opinions of the Grays.. Southampton UFO Group and newsletter gets good mention.. 'deservedly' did I hear you say ?.. UFO Magazine(UK) / IUFOPRA joint Conference '97 gets good coverage.. Jenny Randles cites Rendlesham as most likely Military Operation it says ! But rules out NOTHING ! Thank Goodness !.. Time Slips article good... can vouch for such myself !.. 1st part on that Fife "landing" scenario.. IUFOPRA invites letters, articles, queries ! Silly devils, where will they put them all ? Out here there's a MINT of untold (for various reasons) UFOlogical and paranormal histories !.. "Left At

East Gate" reviewed by A d B.. see earlier... who believes incident "staged" by authorities.. WHY ? If a true military "stealth" craft, where are they NOW ? Well, I dunno ! Po Box 3070, Whitehall, Dublin 9, Ireland, and IR £2.50 Unless a member when it's free. Four issues per year. IUFOGRA also publishes a NETWORK 8 pager for April / May / June '98 on <http://ufinfo.com/iufopra> which is very informative.. points out dangers of "self appointed investigators" who ignore commonsense approach, esp. 14 year olds.. actual case quoted.. so currently only over 18's can be an investigator for the group.

INUFOR DIGEST is the "Down Under" publication covering the scene in Australia and New Zealand.. February '98.. packed full of info from that region.. dramatic article and good sketches of an amazing craft (or crafts) by a Brooklyn (Sydney) resident covered in detail by Moira McGhee.. situation from and over the Hawkesbury River.. long article by Clare Williams on "Common Misidentifications" which are useful to many of us no doubt.. I always think "noise" (if any) and "behavior" are the two elements one should study if given the time, these eliminate false returns altho' one gains by experience.. unpublicized laser displays locally here have taken a second hard look to eliminate I have found !.. but "eliminate" they HAVE been ! Clare is an astronomer and Assistant to the Canberra Planetarium and Observatory but her credits show she isn't "anti-UFO !".. "Beyond the Light Barrier" article useful.. as is Contactee Corner by Moira McGhee whose book "Contacts Down Under" is out soon... three

cases herein are 'disturbingly singular to thousands of others'.. and there's the rub ! Good report on the October 1997 Brisbane Conference.. "Contemplation's" sum that up well... public distrust in Governments might well lead to 'unpredictable political and social conditions' our own Graham Birdsall was a guest speaker and said correctly, our Defense budget would never support ALL those "Flying Triangles" etc reported ! An excellent and well produced magazine that shows how the UFO scene is alive and kicking "Down Under". I wonder, personally, how much those destructive fires and those power which evacuated some cities had UFO or "earth change" connections ? The mag. published at Po Box 783, Kogarah, NSW, 2217, Australia. No Price given.. check.

RAPPORT is unusual, almost unique, I would think, that, in its fourth year and bi-monthly, it is produced, edited, and published solely by those who have had a "Close Encounter" experience.. thus, no "experts" or "sceptics" required, thanks.. I was "luckily", "fortunate", or even "coincidentally" linked with its Editor James Millen when we appeared on a Channel 5 program earlier this year.. to find an organization that I've been LOOKING for for many years (although I DID attend just ONE London meeting when the "Witness Support Group" by the late and much missed Ken Phillips, whose work inspired RAPPORT and indeed commemorates Ken's work in it's front page every issue). Our "Coincidental" experiences of James and myself (even an angiogram prior to heart surgery !) showed me the signpost I'd been led towards since my own

"encounters" that stemmed, it now seems, from childhood. At a "suggested donation" of £1 a copy, Rapport.. a VERY apt title !... contains, naturally, encounters (notably by Elsie Oakenson who I met all those years ago !), article on those standing stones and astronomical connections by Michael Joyce, Channeling Fact or Fiction, a 1975 sighting. If seriously interested and with personal and undoubted "encounter" experience, try James Millen, 84 Dyers Lane, London, SW15 6JU... Maybe one day we'll, together, achieve an ambition of mine to have an all abductee panel at a conference !

Southampton Evening Echo **16.5.98.**

Editors reply to article dated 11th May in the Southampton Evening Echo (See press reviews on page 9) :

Round In Circles.

WITH regards to the item in the Echo on May 11 concerning the first crop circle formation of 1998 I would like to put the record correct.

In fact, the first crop circle formation was recorded on April 19, 1998 at Weyhill, (near Andover) in Hampshire.

It was discovered in oil seed rape consisting of seven 'circles' in 2 separate formations about 108 feet apart.

The UFO Group keeps an avid eye on the phenomenon of Crop Circles, and if your readers require any more information about them or information about the group, then we can be contacted at the address below....

Our Children Are Our Future.

As we grow older, who will fill our boots when we become unable to carry on with our research. There are a number of groups at present being set up by teenagers, who in my opinion, do not have the experience to take up such a challenge and get it right. Many have appeared in newspapers saying, 'Yes, I saw the UFO and I am going to set up my own UFO group'. But what do they really know about setting up a group and the subject of UFOlogy. The Southampton UFO Group gets inquiries from people as young as 11 years old. I send them information about the group, yet we rarely get any replies back. SUFOG's youngest member, I would say, is possibly mid 20's. How do we attract the youngsters into UFOlogy?

One way possibly, is through books and magazines. Well, as for magazines, there is only one available on the shelves which I would recommend anyone to read, and that is UFO Magazine. But there is nothing at all aimed at the younger reader. As for books, things are a little different. One of my jobs, was working in the Library Service within Southampton, and at the time, there were few books available on the subject in 1981. My wife, works for the Southampton Library Service, in a children's Library, and things have changed since 1981. What follows is a look at some of the books that are available, and remember, it is a free service (Unless the books become overdue !) open to everybody....

USBORNE WORLD OF THE UNKNOWN : UFO'S...

This was first published in 1977 and was the first 'Children's' book I held in my collection. The 32 pages, are split into 4 main subject area's, The Story of UFO's, The UFO File, Man-Made UFO's and Alien Astronauts. The UFO consultant used for the book was Alan Fossey, BUDC (any ideas to who Mr. Fossey is / was ?). There are many drawings and illustrations and the odd photograph or two. There is a section that shows you how to build your own UFO and what is needed to photograph your own mock-up UFO. This is a very basic book, but well put together and for a child, the ideal starting point. If this is still available, and you want to build up a your section, then an ideal book to start with. No glossary, but indexed, contains a list of '4' good UFO books, and a list of 3 UFO magazines, plus a list of 3 UFO groups... ISBN 0-86020-150-3....

USBORNE PARANORMAL GUIDES : ALIEN ABDUCTION ? THE EVIDENCE AND THE ARGUMENTS.

A small, compact, A5 sized paperback, first published in 1997 and up to date. The consultants for the book are John and Anne Spencer. The book is divided into 8 case studies, looking at cases such as Mantell's Fatal Flight, Crop Circles, Besieged - Sutton Farm, Kelly, Hopkinsville, Kentucky, USA. Once you are told about the cases, there is the assessment.... For example, The assessment for Roswell are : Project Mogul, Top-secret tests, Mystery Material, Nuclear weapons and Crash test dummies. But, the assessment does not mention that at the end of the day

it could be an alien life form from another planet... A very interesting 48 page book that presents the subject in a strange but very interesting way. It is indexed and contains a glossary, but does not contain a further reading list.... ISBN 07460 30541.

TRUE UFO STORIES : TERRY DEARY.

This is published in England, by Scholastic Children's Books in 1997, and written by Terry Deary. The introduction appears to be a UFO sighting made by the author in January 1996 and sets the scene for the book. The book is divided into subject areas such as MIB's, Alien Kidnapping - Fact File, The Greys, Time travelers. Again, it gives you an outline, and then it gives you a Fact File about each section. Not a bad paper back, good art work and aimed at the slightly older youngster (10 years upwards). No glossary, No Index, and no further reading listing's that let's the book down.

DÖRLING KINDERSLEY : THE UNEXPLAINED : UFO'S AND ALIENS. (COLIN WILSON).

This is a large format, A4 size book, published in 1997, and contains many coloured photographs and pictures. It has a brief look at UFOs Through Time, and even looks at Messages from Space - i.e. Crop Circles, Eric Von Daniken, the Sphinx and the fairies - from outer space ? There is a look at recent sightings such as Rendlesham Forest, lights over Brazil and other sightings. There is a look at the types of craft seen,

Close Encounters - Socorro - Howard Menger - Hopkinsville. There is a look at Encounters and conspiracies - Roswell - Men in Black - Alien bodies and Snippy gets snipped. The last few items look at the Types of Aliens and Alien Abduction. The final chapter 'Is anybody out there' is interested in Life on Mars and the search for alien life. The book is indexed, but contains no glossary and does not have a further reading listing. Another ideal book for the budding UFOlogist and should be added to UFO groups library's.

ISBN 0 - 7894 - 2166 - 6

A Child's Reaction.

As a test for the 4 books I have mentioned, I gave my two sons, Philip aged 7 and Christopher aged 10 the books and said to them which one did they like the best and why?

Christopher (Aged 10):

I gave Christopher the 4 books to look at and after about 10 minutes, he chose Dorling Kindersley's book by Colin Wilson because of the colourful pictures, it was easy to read and he liked the pictures of UFO's and the aliens.

Philip (Aged 7):

I gave the 4 books to Philip, who after studying the books for about 10 Mins, he decided that he liked the Dorling Kindersley's book by Colin Wilson, because it had lots of pictures, aliens and crop circles. He read part of the book with only one or two prompts with some of the words.

Obviously every child is different, in that they have

different reading abilities etc, and prettier pictures sell more books. But remember, our children are our future, and if the youngsters do not come up through the ranks of UFOlogy without reading the right material, then UFOlogy may be lost in time. I am not advocating all children must read these books, but if you have a child between 7 - 10 years who is interested in the subject, then these books give you a starting point and a few ideas and thoughts that may help you with introducing the younger element of humanity to the subject of UFOlogy. I mean, who is going to replace the oldies like me when I am pushing up the daisies?

One final thing, for ease of reference, I found it somewhat disappointing that 3 out of 4 were indexed. Only 1 of the books had a glossary (i.e. explanation of the terminology used in UFOlogy such as explaining the word U.F.O) and only one book had a further reading listing. I feel that all UFOlogical books aimed at younger people should have a glossary of terms as well as further reading lists to encourage further reading. My overall favorite book is 'Usborne World of the Unknown' : UFO's'. Lets see how that compares with the children's result : Both Chris and Philip chose the Dorling Kindersley's book..... Oh well, you can't win them all..... !!

First Crop Circle of 98...

It appears that the first crop circles of 1998 have appeared in Hampshire. The formation, consisting of around 4 circles, appeared in a field of rape near Thruxton Airfield, Andover. They were reported to Busty Taylor on the 19th April, by one of his fellow pilots. (This happens to be the airfield that Busty Taylor does his flying from... coincidence !). More on this formation and any others, when the information becomes available.

(Information obtained via OVNI Magazine May / June 1998)

Dorchester Conference 1998.
One To Forget ?
Editors report.

The Dorchester Conference is one of only 2 conferences I try to attend each year and I look forward to its arrival. We (Group member Bill Smith and I) hit the road at 7.30 am and arrived in Dorchester at 9 am (First mistake of the day !) 45 Mins early & it had started to rain. At the venue, we gave up our ticket and had half of it returned for the draw later in the day... What would I win ? We found 2 seats in the front row and decided to have a look at the 'stalls'. Well, there were 5 stalls and a 6th turned up just before the first interval. Speaker Renee Henry had a table selling her books 'The Battle of the Trees' & 'Alternative 4' (Any connection with Alternative 3 ?). Then, I thought Steve Alexander was there selling 'his' dubious photographs of crop circles (Why, when people sell such things don't they say 'Yes, this is a crop circle formation, but these ones on this side are hoax's and the others we do not yet know if they are a genuine phenomenon or not' - mind you, who would buy photographs of 'hoaxed' crop circle formations !) - but I was wrong, it was Lucy Pringle selling 'her' dubious photographs along with her crop circle merchandise - I steered clear of this one.

The next table was manned by George Wingfield, selling back issues of UFO Reality (Looks like he has been left with a job lot) at £2.00 each. Also, he was selling books and videos (Masters of the Stars series) and of course the odd crop circle item or 2. Mind you, Bill was going to purchase a book and on the back quoted \$6.95 (bear in mind the current rate of

exchange is around \$1.68 per £1.00, so the book should of been priced around £4.00), they wanted nearly £7.00. The reason - because of the costs of importing the books from America... I stayed away from that one too.. Finally, in the confines of the small room, was Marcus Allen's stall selling Nexus magazine, books and video's. Mind you, the video's ranged from £20.00 each, so again, I gave this one a wide birth.

Outside in the entrance way, Graham Birdsall's wife was manning Quest's stall. I walked away with 1 video and 2 audio tapes - a very happy man....

So, Mistake 2... 5 stalls, in a room containing the tea, coffee and snacks area, no room to swing a cat with barging elbows, people carrying hot cups of tea and coffee - a disaster in the making....

The Speakers.

Terry Le Riche Walters.

Although not my cup of tea and I have not had any Psychic, Alien or paranormal experiences .. or have I ?... His lecture was interesting and I must admit, his 'stories' were very expressive, especially the operation he had on his back to remove 3 discs, that is medically impossible and not performed by a doctor on this planet. We were shown representations of the 'Star People', their blue eyes, humanoid figures, blonde hair (Where have I seen this description before - Adamski ?). An interesting lecture on healing, but as Terry said, he could of talked for 4 - 5 hours ! maybe the next time !

Marcus Allen.

Marcus always gives an excellent lecture (mind you, this is the 3rd time that I have heard his moon landing lecture !). He opened his lecture by saying we were 'getting 2 lectures in one. The first half looked at the world of conspiracies and painted a picture for the second half, the alleged Moon landing. Did we land on the Moon ? Well, we went there, but from what Marcus said and the pictures he showed, I doubt it very much ! There were many anomalies in the pictures, i.e. shadow positions, 'Fill in light', dubious backgrounds that appeared to be 'painted' back drops, Letters on the rocks - in one case the letter 'C' and why was there no 'crater' under the lander after it blasted down on the dusty surface.... A very good lecture which certainly leaves you with questions on your mind...!

Graham Birdsall.

Graham was the main reason why I attended the conference, as I feel he is the best lecturer in this country, he knows his subject and presents it with excellent video and slide presentations. He opened the lecture with a look at cattle mutilations, with graphic pictures. His lecture went on to cover such things as the Flying Triangle phenomenon and he stated that he is convinced people in the USA and Great Britain are playing about with some kind of flying triangle. But, there would have to be squadrons of them to support the number of reported sightings. One lighter event during his lecture, was the local boys brigade or similar decided to strike up in the middle of his talk.. This threw everyone into fits of laughter and even Graham had a good laugh. This was a great presentation, with some great slides

and very interesting video footage. Well worth listening to.

Paul Vigay.

Paul is a man very much into computer programming and computers. His lecture was based partly on the hoaxed crop circle film footage we recently saw and how, he could re-create it on his on computer. Paul has written his own computer program to be able to measure them back at home and to carry out other tests. He showed us his current research methods, and even ended up with showing us how he could create music from them. An interesting lecture, that updated his recent lecture given to the Southampton UFO Group.

Renee Henry (Author).

The 3rd mistake of the day... After the first 5 minutes of this lecture, I was lost. After 10 Mins, my brain hurt and after 15 Mins I wished Scotty would beam me up ! This talk concerned such groups as the Masons, The Knights Templars and Hitler even got a mention. Groups such as these are molding us into a one rule one state, and we have to save ourselves and it is up to us. Also, the body has 'magnetic areas', and there are such projects like Project H.A.R.P in Canada, where our magnetic structure / signals can be altered by others, that can alter our lives. I gave Bill a nudge after 20 Mins or so as his snoring was getting loud ! The lecturer was given the signal to wind up, but instead she speeded up and was determined to finish her lecture. In the end, the compare had to tell her to finish and she did, still with slides to show.... I reckon the

compare should of been given a medal. I am afraid I found this lecture a total boar and was not worth the money I paid to hear it ! Mind you, there were some people who enjoyed it.. Mind you I wonder if they knew what the secret hand shake is !

David Kingston.

David's lecture was mostly taken up with over 18 hrs of video footage taken onboard the MIR space station, some of which has been shown on German Television. The footage showed objects shooting about in space, and one object, round, gray in colour hovering in space as if observing the MIR space station.

One piece, showed a dark, small, shadowy object darting around. NASA said it was a fly ! David said 'I have never seen a fly in a space ship' ! I must admit, I think it is a fly, trapped in the camera body either near the prism or behind the lens, that moves around now and then. Some insects can go without food and water for weeks and weeks. Trapped inside the camera, in theory, air tight, it has its own living environment. I have photographs of insects close to a camera lens, and I have one taken in America, showing just this, an insect with what appears to have 6 legs.... So, anything is possible. So the 4th mistake of the day was due to Renee Henry droning on and on, David's lecture was cut to 30 minutes only.

Overall Comments.

Mistake 1 : Arriving too early.
Mistake 2 : Not enough booksellers
Mistake 3 : Renee Henry's lecture
Mistake 4 : Cutting David Kingston's lecture to 30 Mins.

I did enjoy the day although I seem somewhat scathing with one or two things, but, we all have our own views and opinions and hopefully fellow member Bill Smith will be putting pen to paper and expressing his enjoyment of the day. If I was to give the conference marks out of ten, then well I think I can stretch to 7 out of 10.....

Steve Gerrard

UFO Report April 1998.

17.4.98
Midnight
A5, Milton Keynes.

Witness saw object consisting of 3 - 5 lights, with 3 being in a Triangular formation. It stopped ahead, hovered, and flashed its lights at the witness. There appeared to be a 'strobe' light on the side of the craft. It hovered for a further 5 Mins, flashed its lights again and shot upwards at speed and disappeared to the West. That the night, the witness suffered a nightmare.

Details of this sighting have been passed to Omar Fowler of the PRA, based in Derbyshire, who is going to follow-up the sighting.

Membership Cards are here to stay....

Don't forget, when you re-subscribe to the SUFOG newsletter, you will receive your new members card. This will entitle you to cheaper admission charges to our speakers on a Sunday afternoon. So, the sooner you re-subscribe, the sooner you will see the benefits and save yourself money.....

TITLE : Of No Defense Significance ? **AUTHOR :** John Jenkins. **Publisher :** The PEN-Y-COE PRESS, 7 Bridge Street, Penicuik, Midlothian, Scotland, EH26 8LL.

Since the author's own UFO sighting back in December 1992, the subject of UFOs has held a deep fascination for him, so much so, that he decided to go on a one man crusade and delve into researching the mysterious world of UFO sightings. This book, is the culmination of John's efforts and research. It is an informative little booklet which contains a number of UFO cases that John himself has personally been involved with. No book on Scottish UFO reports would be complete without including the Bob Taylor UFO Incident of 1979, and John presents the case here in graphic detail. There is also some new information about this impressive Scottish case which I won't disclose here, (buy the book and find out !).

The UFO sightings of Joyce Byres from Moffat are perhaps not so well known to some UFOlogists, but I'm pleased to see that the author discusses them here. This concerns a wave of UFO reports in the Dumfries and Galloway region of Scotland back in the late 1970's and early 1980's. The author presents some of these cases which even today, still sound impressive, (I know, I cut my teeth on these early UFO sightings !!).

But the big cases in this book are that of the A70 Incident which is briefly covered here. This concerns the abduction of two Edinburgh men who came in direct contact with a UFO hovering above a road. This is an immense case, and John

discusses it's implications here. Another big case, is that of Andy Swan who saw a UFO at close quarters of which he then telephoned the police who came out due to the distress that he was in. John informs the reader all about this case and one is left with the distinct impression, that this object clearly was not man made ! The UFO sightings at Bonnybridge are also briefly discussed here and a number of new and never before published cases are presented for the very first time.

The good points about this book must be the information that it contains, some of which, as I say, is being presented for the very first time. My only minor criticism of this booklet, is that it has no page numbers or table of contents, That aside, this is a smashing wee publication which will no doubt prove to be a hit amongst UFO fans young and old alike. A fine booklet then, and one worthy of gracing anyone's bookshelf.

Reviewed by Malcolm Robinson, Strange Phenomena Investigations, Scotland.

A Snippet From a Member.

Long-time member Robert Fisher, from Bristol, recently sent me the following item that appeared in his local newspaper dated 2nd March 1998 :

Riddle of yellow light over city.

A Factory worker who saw a mysterious light in the skies over Bristol has appealed for anyone else who saw it to come

forward.

David Hobbs saw the bright yellow, pear-shaped light hovering above the city at 7.15 p.m. on Friday when he was working at the English Corrugating Paper factory in Portland Square.

He saw the light glow and disappear towards Eastville.

Mutilation in Southampton ?

The Southampton UFO Group appears to have its first animal mutilation case. Bill Smith, group member came across a dead ring tail Dove. Nothing strange in that is there ? Well, when he brought it around to my house, I was surprised to see a hole, the size of a 1p piece in its back, between the wings. A precise circular hole... How did it get there ? Bill took the carcass home, and photographed the damaged area. Bill approached a neighbor, who is a pigeon breeder and showed it to him. He had no idea how the hole was made, and said 'wait a minute Bill, the heart etc is missing from inside'.... Bill is currently doing a full report, and **WHEN** your editor gets copies of the photographs, he will pass them onto Quest International and see how the photos compare to their reports of animal mutilations. We will keep you informed about this event and I hope to publish Bill's report when he has completed it. If anyone out there has any ideas about this pigeons demise, then I am sure readers would like to read your views etc.

Steve Gerrard.

Water Water Everywhere !!!

Much of the press and television, during the week of the 6th April carried the news that results from the European Space Agency's £600 Million Infra-red Space Observatory has revealed vast quantities of water in the deserts of space that encourage expectations of alien life !

I can not help but wonder, what makes scientists believe, that the existence of water in space means that there is alien life out there. I admit, there may be life out in the universe and far beyond, that, like the human race depends on water to survive. If we do not have water, then we die, its as simple as that. So, are the alleged 'canyons' and 'dry river beds' on Mars a sign, that there was once life on Mars ? Did these dry up, and the 'Life' on Mars die, leaving the area of Cydonia as a memorial to its culture ?

There have been cases throughout the world of UFOlogy, where alien craft have sucked up water from lakes and rivers, aliens, have been seen collecting 'samples', but tell me, has anyone actually seen an alien 'drink' water.... ! I must admit, I do not recall such a case, but I may be wrong ! How many times have abductees reported seeing anything such as 'Water' being drunk or in containers on UFO's. Okay, some people say that they have seen baby aliens in incubation 'tanks', but what was in these incubation tanks... water.. well, if not, what ?

If (and I know its a BIG word !) we assume that alien life exists, and the evidence exists with the many thousands of alleged abduction cases and millions of

UFO reports, does it mean that they need water to survive ? I feel that alien life forms (including ours) evolve due to its environment and evolution. So, if there is an atmosphere that contains, say no oxygen, but some other kind gas, then surely life evolves and develops to adapt to its environment. Man went to the moon and fly's in space. We have 'adapted' ourselves by building self-contained spaceships with machines that generate oxygen. So, could an alien life form develop some way of 'protecting' itself when it pays mankind a visit. Like-wise, us humans have blood that carries oxygen to the brain. If alien life does not breath air, then maybe its whole internal body structure is different, in that it 'produces' its own kind of in-built 'oxygen'. Many aliens are reported with either very small noses, or no noses at all, why ? because they do not breath oxygen. Like-wise with water, if alien life has a completely different set-up as with regards to internal organs, then why does it need water ! When we see aliens taking samples, are they not like us humans, who take samples from our surroundings, to look at under the microscope. Are we like ants under a microscope being 'examined' by our keepers from out space.... Alien technology is well in advanced of us earthlings, who, don't forget, were only riding about on horses and on trams approx. 100 years ago and 30 years ago, man was heading to the Moon. Just think what could be possible, if, technology was 1,000 years ahead of itself. A trip to Pluto, would be like going round to the corner shop to get a loaf of bread.....

I often wonder why science is so blinkered to the fact, that, alien's should be so like us. We

hear reports of 'Humanoid type creatures'.. Well, if you had 3 heads, 4 arms, 3 legs and 3 sets of eyes, would you not try and 'change' your looks so that those you are visiting don't take to the hills faster than Linford Christie. Is it some kind of mind projection image, that feeds us with a false image. I feel that 'Other' life forms have developed in such a way, that the fact water, according to the scientists of this world is 'One of the building blocks for life', has probably been replaced by the gases that are available on their planets and that when they pay us a visit, their bodies, because they self-generate their own 'oxygen', and that their evolution has evolved without one of the elements of survival on this planet, one of the building blocks in space 'water', has been replaced by something else within their own evolution. Also, do not forget, that many many people have reported alien life forms devoid of any genitals... why ? have they evolved a way of reproduction, that does away with the reproductive systems that us humans up until recently have relied on. We can freeze embryos and clone embryos, so are these alien critters further ahead in evolution than this.... If we can reproduce our young in a test tube, then these incubation 'tanks' may be the only way alien life forms can 're-produce' itself...

As for water, well, at the moment this planet seems awash with the stuff, so any of you aliens out there that are reading this article, we have plenty for you to take home with you.....

Steve Gerrard (Editor)

The Risk of Becoming Alienated.

In the ever changing kaleidoscope of information and disinformation which besets present day UFOlogy, it is becoming increasingly difficult to "see the wood for the trees". In my capacity as chairman and founder of one of the smaller UFO groups in this country, I am ever conscious of the considerable responsibility I have to my members, in projecting the subject in it's true light. We need to recognize that there are forces at work which can easily distort the public's perception of what UFOlogy stands for. "The more incredible the story, the greater the market" seems to be the slide rule used by those who are motivated by monetary gain. The infamous Roswell autopsy saga is just one example, which fully deserved the ridicule it eventually received. However, this was not before this particular piece of nonsense had raked in considerable profits, through the gullibility of those prepared to pay an extortionate fee for the video.

The responsibility for maintaining the UFO movement's credibility lies fairly and squarely on those who are in the media limelight. Whether writing columns in mainstream UFO magazines, publishing their own books, or speaking at conferences or on T.V. programs, their influence on public consciousness is enormous. The vast majority of these 'experts' are level headed, honest, and unlikely to exaggerate the truth, be it relating to aliens, UFO incidents or the like. Yet, such is the nature of the phenomena in general, there

will always be those who are tempted to add an extra ingredient to the mixture, and sell it as 'truth' despite it's unprovability. Some sections of the national press are particularly prone to adopting a 'fantasy' type journalistic approach to UFO reports, and alleged alien encounters. Such accounts are readily recognized by mainstream UFOlogists as being 'O.T.T.' What should concern us, is how this affects public perception of a subject, which in time will undoubtedly have a profound effect on each and every one of us.

UFOlogy should not be considered a closed unit for the exclusive few, who happen to consider the subject interesting enough to investigate. The global network of UFO groups provide a visual source of learning, which needs to be recognized by the public at large. We cannot hope to attract the average person in the street, if the phenomena continues to be misrepresented. To describe a conference committee as 'Alien Freaks' or perpetuate a belief that our planet is under "Alien Threat" does nothing to encourage people to be associated with UFOlogy. Sensationalism sells newspapers, but the is exactly the point. There remains always a 'gullible' section of the public, who having been given the wrong message, will, sadly, believe it.

Suppressed aerial technology, which surely accounts for a large proportion of UFO sightings, will revolutionize our future, whenever it is publicly unveiled. Until that time, those privy to it's power will continue to guard it's secrets. Whether an element of this awesome power, of which

we have only had glimpses, originates from an E.T. source, remains unanswered. Evidence from dubious 'witnesses' it has, is at best 'hearsay', and therefore, like so many claims regarding the subject, as much a mystery as the phenomenon itself. However, the E.T. influence on human thinking has become an even stranger one, since it's embryo more than fifty years ago. The alleged crash of a spacecraft, followed by the laughable suggestion that aliens were allowed to undergo their "Abduction Program", in return for information on E.T. technology, is now part of UFO folklore. Given the thousands of abductions carried out since, all of which have been successfully managed without apprehending the perpetrators, the aliens hardly needed permission, let alone feel obliged to give away their technological supremacy.

Distortion of the truth as an effective means of control, has been exercised by those in power throughout human history. One sees elements of it permeating all structures of past civilizations, and it continues it's invisible course to this day. Whether it be religion, fashion, consumable, advertising, or media one can trace elements which influenced and controlled our thinking.

The billion of dollars spent on advanced aerial technology in America, may well have been more than sufficient to produce disc shaped crafts, with abilities beyond our imagination, without any 'Alien' help.

However, to dismiss the alien presence out of hand would be foolish. How can we deny the existence of something, which because of it's apparent nature

does not conform to our own sense of reality ? Oxygen, Nitrogen, and Carbon Dioxide form part of the air we breath and exhale. If we were ignorant of their identity, we would deny their existence, yet they are as much a part of our environment as we are. Many alleged abductees describe their alien visitors as "suddenly appearing before them" or "seeming to float through the wall". If this is eventually proved, then they clearly operate in a different dimension to ours, hence the difficulty we have in believing in their existence. John E. Mack the eminent professor of psychiatry recognizes this 'belief' problem in his remarkable book "Abduction". He suggests that the human species requires a kind of cultural ego death. An acceptance that we are not the pre-eminent intelligent beings, in a universe more or less empty of conscious life. Perhaps when we are willing to accept this principal, will we be more ready to at least consider some of the alleged alien encounters as worthy of our closer attention.

We live in what could almost be described as an alien cult. A society in which an alarmingly increasing array of items can be purchased with the now familiar "Alien" face. It seems the "Little Green Men from Mars" have been replaced by the "Little Greys from Roswell and alien bases". The alarm bells are ringing ! The fat cats of merchandising are getting fatter, at the expense of a public who are in danger of perceiving UFOlogy as a source of amusement, rather than the intelligent science it undoubtedly is. Worldwide, the UFO community need to raise the sails of common

sense when exposed in the public arena. The UFO movement relies on it's peers to maintain the respect it deserves. Without it, UFOlogy will founder on rocks of it's own making. The current slump in magazine sales is the result I feel of a market that was over subscribed from the start, and may well prove beneficial in the long run.

It is my considered opinion, that the most effective tool for enlightening the public to the merits of sound research, is the staging of UFO conferences. I applaud those who undertake such ventures, for I know first hand the immense effort, not to mention expense, which goes into producing them. UFOlogy is extremely fortunate in this country in having many highly motivated people. Their endeavors in reporting facts, providing group facilities, not to mention their valuable contributions to research, ensures that British UFOlogy is very much alive. Let us hope that all this effort is not jeopardized by the few who seek to sensationalize, or we run the risk of becoming alienated ourselves !

David Quickenden,
(Chairman - Astrasearch)

BBC 2 - 8th January 98.

Did anyone out there happen to see a program called 'Right to Differ'.... I understand it was concerned with abduction cases especially with a Scottish case back in November 1996. If you happened to see this program and you recorded it, then could you let the editor know and may be send him a copy of the program to add to his video collection...

Crop Circles Crop - Up..

A second formation has appeared opposite Silbury Hill in Wiltshire. It consists of a large circle with a small internal circle and avenues coming from it. Found on the Bank Holiday weekend 3.5.98 in a field of Rape. The formation was found in the same field as the 1994 Scorpion formation.... See page 14 of newsletter for the first formation of 1998....

'Triangle UFO' at Common....

Strange objects have been seen in the skies above Hartlebury Common, the beauty spot near Stourport.

And UFO Research Midlands, the body which investigates reports of unidentified flying objects, is to arrange a skywatch.

Spokesman Trevor Wylde said that a large black triangular shape had been seen hovering over the Common.

He added : "There was a flash of light and it disappeared at incredible speed".

Mr. Wylde is seeking more information about the sightings and anyone who can help should contact him on 0121 585 7464.

Points Arising from SUFOG meeting Sunday 26th April.

UFO Sighting Report from Leicestershire : Details were passed of this Triangular craft and members were advised that the sighting has been passed to Omar Fowler (PRA), in Derbyshire.

Investigators Course - Update : The course is now ready and names were given at the meeting of those interested in attending. (If any other members want to come along, please let me have your name A.S.A.P).

ID cards for investigators and members : This was agreed to and when membership is renewed, members will receive a membership card. Also, when perspective investigators have 'passed' the course, then an identification card will be issued. A member of the group has donated £10 to cover the costs of the investigators Id cards at £1.67 each. It was also decided to have married couples membership of £7.50 per year and a family membership (2 + 2) for £10.00 per year. There were a couple of amendments suggested for the membership and investigators card which will be carried out.

Mutilated Pigeon : Group member Bill Smith updated us on this strange happening and he has photographed the carcass and has disposed of it. We were unable to get the animal to a vets, but Bill will be supplying a full report in due course.

Dorchester Conference 19.4.98 : A quick report was given of this event (See full report in newsletter) which provided a lively debate about the possibilities of bases on the Moon (Ours or theirs !).

Beyond Roswell CD : The group advised that I have received a copy of the adaptation of the book with the same title, that is now available on CD Rom for computers. A review will appear in the next edition of the newsletter.

Quest International / SUFOG Joint Conference : Members were told of this exciting venture for 1999 and we have already formed a working party into organizing this event. Members suggested speakers such as Linda M.Howe, Stanton Friedman, Nick Redfern as possible speakers. We will update you hopefully in the next newsletter as to the progress and possible date for the venture.

Avebury Trip 16th - 17th May - Anyone interested : There were 3 people who showed an interest, but as we really need upwards of 10 people (the cost of hiring a mini bus etc), therefore due to the small numbers wishing to go, we canceled the trip and may possibly organize one for a later date.

Group Funds : Members advised that we current have £170.00 in group funds and we still have to pay for hiring the hall on 2 occasions. This will mean, that the group will have approx. £136.00 in the building society account.

Ernie Sears lecture : Advertising is ready and 4 members expressed an interest regarding placing posters in shops etc.

Advert for Quest International 'UFO Magazine' : This was agreed, and we will place the advert twice a year, at a cost to the group of £8.20 per entry, to try and attract more members.

Other business : We have decided to make our group meeting on 26th July to be an open Forum so we can all lay our cards on the table and have a group discussion on the whole subject of UFOlogy. Also, the car boot sale is to go ahead at the end of May, and Bill Smith has said that he will go along and help me set up and sell items.

**FORTHCOMING EVENTS IN THE SUFOG
CALENDAR 1998 / 1999.**

SUNDAY 8TH November 1998 : **Malcolm Robinson** of SPI (Scotland) will be our invited speaker from 3 p.m. - 6 p.m. Ticket prices are £6 each in advance and £7 at the door.

SUNDAY 21ST February 1999 : **James Millen** of the Witness Support Group (Abductee's) has been invited to speak to the group 3 p.m. - 6 p.m., and to date (26th May 1998) has to be confirmed. Further details when available. Ticket prices are £5 in advance and £6 in advance. (This still has to be confirmed with Mr. Millen - If unavailable, another speaker will be approached)

SUNDAY 20TH June 1999 : **Lionel Beer** (BUFORA Member and UFO book seller) will be our invited speaker from 3 p.m. - 6 p.m. Ticket prices are £5 in advance and £6 at the door.

All the above speakers / events will be advertised through Quest Magazine at a cost of £6 per advert. Also, adverts will be placed in local free newspapers and the Southampton Evening Echo. Also, local radio and television will be contacted. One final thing, if you know of any local shops etc that would place a poster in their window, then let me know, and I will send you posters e.t.c.

Finally, I have contacted local author **Bob Price**, author of 'UFO's over Hampshire and the Isle of Wight', and I have asked if he would give a talk at one of our group meetings on a Sunday evening. Date to be arranged / confirmed and entry fee to be £3.50 for the evening.

A Theory About Alien Technology...

DISCTECH

By Robert Kingsley Morison.

There is abundant evidence that alien astronauts are exploring Planet Earth. The vehicles observed have no visible means of support such as rocket propulsion, jet engines, rotor blades or wings, although they must be counteracting the force of gravity.

But how ? For half a century no one had the faintest idea. It is one mystery driving scientists frantic. Another one is the actual cause of gravity ; this has never been discovered, and there is no satisfactory explanation in any text-book.

Disctech responds to both challenges. The combined intellectual experiments of Kraft and Gulko result in a theory about gravity, and this fits in brilliantly with C.E Last's gravitational theory and with speculations about infinity.

Robert Morison responds to the challenge of intrusive astronauts, firstly by looking at encounters characterized by force field effects, and secondly by devising a cunning plan for canceling gravity.

He also considers the relevant issues of the track record of science in the past, New Age attitudes to the Universe, extraterrestrials' attitudes to us and the significance of crop circle artwork.

If his levitation idea works, the release of **Disctech** will place immense power in the hands of the people.

Fortunately for aficionados of the unexplained, air force authorities and intelligence agencies will not be able to put the book down.
